

## CEPF Website Redesign and Redevelopment Addendum: Answers to applicants' questions

Additional answers to questions posed by interested firms will be posted as they become available on the CEPF website: [cepf.net/grants/Pages/Web-Design-and-Development-Consultant.aspx](http://cepf.net/grants/Pages/Web-Design-and-Development-Consultant.aspx)

1. The new site is meant to replace the English, French and Japanese sites. The non-English sites are much smaller than the English site. We are open to keeping the three sites separate, and to integrating them into one CMS. The multilingual support is intended to support content in French, Japanese and possibly Spanish. Ideally, in the future, the CMS could also be in those languages.
2. For at least the next year or so, CEPF will not be able to pursue the development of a new brand.
3. In total, including the French and Japanese sites, the CEPF website has about 2,500 pages (approximately 2,300 pages on the English site, 100 pages on the French site, and 100 pages on the Japanese site) and 4,000 documents that we would like to migrate to the new site.
4. CEPF will develop the SEO, including keywords and editing existing content. We would like the firm to build the site so that it can facilitate easy implementation of tagging and SEO campaigns by CEPF.
5. The project/grants database and digital asset library are an important part of the project, and so it now has its own appendix (Appendix 11) to explain the desired features and corresponding deliverables.
6. The interviews for the finalist candidates will be conducted by teleconference or in person.
7. CEPF and Conservation International will provide hosting solutions for the new website.

5 October 2016

## Appendix 11 Project/grants database and digital asset library

CEPF will soon use a grants management database with Salesforce's FoundationConnect. It is essential for the CEPF website to have integration of FoundationConnect with an online project database. Currently, CEPF uses an Oracle-based grants management database, which generates XML files that are used by the project database on [cepf.net](http://cepf.net).

This is the current project database on the CEPF website:  
[http://www.cepf.net/grants/project\\_database/Pages/default.aspx](http://www.cepf.net/grants/project_database/Pages/default.aspx)

Here is an example of an XML file generated by CEPF's Oracle-based database:  
<https://gem.conservation.org/record/tools/CEPF/getxml.jsp?region=Atlantic%20Forest>

Additionally, CEPF has many knowledge products in the form of documents, photos, video and audio. To easily locate these items, it would be best if they were all hosted in the same library or database, with an intuitive search and sort interface on the front-end of the new website.

Both the project database and digital asset library could be combined into one platform, or may need to be two separate platforms. Both platforms will require a back-end tagging system and taxonomy to assign accurate and comprehensive metadata, which the database can push to the user to search and sort the knowledge products/assets on the front-end.

### **Database (digital asset library)**

Below is a basic outline of the visual and UX design requirements for an online database with indexing, search and tags for joint or separate databases/libraries

- Library data
  - Lessons Learned and corresponding publications
  - Grantee and subgrantee partners list
  - Contact info for RITs and grantees
  - Project Database to include integration with Foundation Connect
    - Pull documents: Project Final Competition Reports, Safeguards, Technical Reports, and corresponding appendices
    - Pull new grants with web descriptions

- Sort and search projects and documents (and possibly images, video and audio) by
  - Title
  - Hotspot
  - Region
  - KBA
  - Corridor
  - Country
  - Grantee
  - Pre-defined project category
  - Grant period
  - Active/inactive
  - Grant amount
  - Keyword
  - Alphabetically
  - Chronologically
- View type of document, examples:
  - Templates
  - Models
  - Tools
  - Best practices
  - Lessons learned
  - Final reports
  - Safegaurds
  - Technical
  - Other project-specific assets (video, photos, links, documents)
- View by audience
  - Grantee
  - Donor
  - Scholar
