

CEPF Website Redesign and Redevelopment
Addendum 6: Answers to applicants' questions
21 October 2016

This is the final addendum for this call for proposals.

Additional answers to questions posed by interested firms have been posted on the CEPF website: cepf.net/grants/Pages/Web-Design-and-Development-Consultant.aspx

1. At the time of the website launch, CEPF will not have the six newly developed innovative knowledge products (documenting models, tools and best practices developed under the project, including at least one related to gender mainstreaming and at least one related to Indigenous People and conservation). However, the website should be designed to have a place for these digital assets, which will most likely be documents.
2. All copy for the website will be provided to the developer.

Point of contact
