

## Call for Letters of Inquiry Madagascar and the Indian Ocean Islands (MADIO) Biodiversity Hotspot

### Large Grants

**Eligible Country: Comoros**

**Opening Date: 08 August 2024**

**Closing Date: 20 September 2024, 11.59 pm (Eastern Time, GMT-4)**

**Grant Size: Large Grant (>US\$50,000)**

The [Critical Ecosystem Partnership Fund](#) (CEPF) and its regional implementation team (RIT) for the hotspot the Madagascar and the Indian Ocean Islands, are accepting letters of inquiry (LOIs) from non-governmental organisations, community groups, Indigenous peoples' organisations, women's groups, private companies and other [civil society organizations](#) for projects that promote ecosystem-based adaptation (EbA) in response to climate change and address the eligible activities and geographies of this call.

For more information about CEPF investment in the hotspot, consult:

- Ecosystem Profile: [English - French](#)
- Ecosystem-based Adaptation in the Indian Ocean: [English - French](#)

## 1. ELIGIBILITY

### Eligible Applicants

Applicants based outside the eligible geographic areas are eligible as long as the project deliverables are focused on the conservation needs of this call within the eligible geographies.

Preference will be given to projects that show that they will coordinate with other organisations to prevent duplication of efforts, for instance through partnerships and alliances. As such, joint projects with multiple organisations are eligible, as long as one lead organisation submits the application and all project partners have clear roles defined in the application.

Applying organisations must have their own bank accounts and be legally entitled to receive grants.

Applicants are strongly encouraged to familiarise themselves with the CEPF website, particularly the sections on [Eligibility](#), [Before You Apply](#) and [How to Apply](#). Potential

applicants who are uncertain of the eligibility of their organisation or project concept are encouraged to contact the RIT at [cepfproposals@iucn.nl](mailto:cepfproposals@iucn.nl) for clarification.

## Eligible Technical Scopes

Applicants should ensure that the core content of their LOI refers to Strategic Direction 1 and one or both of its Investment Priorities as listed below. Failing to align with this strategic direction will result in the application being considered ineligible.

***Strategic Direction 1: Empower communities and civil society to implement actions to improve the resilience of species, ecosystems, and human populations to climate change in priority KBAs***

This strategic direction will focus on providing the necessary funding, technical support, and capacity building for CSOs to implement EbA actions to improve the resilience of the most vulnerable species, ecosystems, and people to climate change. Expected outcomes include increased resilience and improved livelihoods for vulnerable populations, but also improved resilience of ecosystems and ecosystem services.

**Investment Priority 1.1: Implement EbA actions, including agroforestry, “climate smart agriculture”, eradication of IAS, restoration of degraded watersheds and coastal ecosystems (including wetlands, mangroves, reefs and seagrass beds), and promotion of sustainable management of coastal and terrestrial ecosystems**

Eligible projects will be those proposing to design and implement EbA, Nature-Based Solutions (NbS) and conservation actions that respond to climate impacts at priority KBAs. Activities will analyze the adverse impacts of climate change on human livelihoods and propose solutions that can support, conserve, or restore species and natural areas in ways that help regulate or diminish the negative impacts. Identified solutions will then need to be planned based on an understanding of their costs and strategies to cover those costs, both during the projects and beyond, to ensure the sustainability and continuity of the new EbA actions.

**Investment Priority 1.2: Support the establishment and development of economic models that improve the resilience of local communities to climate change and support value chains for natural products, while strengthening ecosystem services that contribute to EbA**

Eligible projects will be those proposing to support the development of economic models that improve community resilience to climate change, including nature-based tourism and sustainable production of natural products. This could be done, in particular, through strengthening the factors of production, improving access to national and international markets and/or capacity building in business management and entrepreneurship.

**For this call, within the guidelines of Strategic Direction 1 and its associated Investment Priorities, only the following types of project will be considered eligible:**

- o Projects that strengthen coastal ecosystem management (mangroves, coral reefs, seagrass beds) with contribution from the Private Sector (stewardship system).
- o Projects carried out by local institutions (sustainability) or that involve or support them.
- o Restoration projects including invasive alien species eradication/reduction activities.
- o Projects that provide support to Indigenous and local communities in community-based or co-management activities for EbA and actions that enhance local communities' tenure and resource use rights.

**For this call, the targets that projects are expected to partially or fully contribute to are:**

- 610,000 hectares of intact coastal\* ecosystems with enhanced management
- 2,000 hectares of degraded coastal\* ecosystems restored.
- 1,000 hectares of small island ecosystems where invasive alien species have been eliminated or reduced.
- 16,500 women and 16,500 men with increased income as a result of ecosystem-based livelihood activities (sustainable fishing, nature-based tourism, harvesting natural products, etc.).
- 152,500 women and 152,500 men with non-monetary benefits other than formal training, as a result of strengthened ecosystem service delivery.
- 22,000 men benefiting from climate-resilient livelihood activities.
- 22,000 women benefiting from climate-resilient livelihood activities.

\*In the case of the CEPF project for this investment, "coastal" refers to both habitats along the coast, above the low tideline (mangroves, beaches, lagoons, etc.) and inshore marine areas along the coast and below the low tideline (seagrass beds, coral reefs, etc.).

**LOIs should explicitly present the expected contributions of the projects towards these CEPF targets, with intermediate contributions by 31 December 2026 and final contributions by the project end.**

## **Eligible Geographic Areas**

This Call is open to 6 priority KBAs identified by the CEPF for Comoros.

KBA Code	KBA Name
COM-08	Mohéli Marine Park
COM-12	Bimbini area and La Selle islet
COM-14	Domoni area
COM-16	Moya area
COM-19	Pomoni area
COM-20	Coelacanth area

To help you locate the 6 KBAs open for this call, an interactive map showing all the priority KBAs identified by CEPF in the hotspot is available [here](#).

## Eligible Budget and Timeframe

The minimum amount for large grants is US\$50,000. Applications with a budget that is inferior to this amount will not be eligible for review, but applicants can check the call for small grants.

**Large grant projects can start as of 1 April 2025 and last until 31 December 2029 (56 months). However, every project will need to be designed in such a way that intermediate results towards the CEPF targets will be achieved by 31 December 2026.**

In case the project is part of a larger programme that runs beyond CEPF timelines and/or eligibility criteria, please ensure there is a clear distinction between the CEPF part (including activities and results) and the rest of the programme.

## General Eligibility Criteria

Priority will be given to projects that:

- i. Demonstrate that the proposed EbA activity addresses vulnerability based on a clear climate change risk.
- ii. Adopt EbA approaches that increase the resilience of ecosystems and ecosystem services in the priority KBAs.
- iii. Reflect on the climate change mitigation potential of the project.

- iv. Address priorities identified in national climate change policy or strategy documents of the relevant country of implementation.
- v. Demonstrate positive gender impacts.
- vi. Demonstrate effective and efficient use of funds.
- vii. Demonstrate a clear strategy for achieving financial sustainability.
- viii. Are the closest fit to the investment strategy set out in the ecosystem profile.

Other considerations that will strengthen an application include:

- o Clear plans for continuing the project after the proposed project end date.
- o Complementarity to existing projects and coordination or partnership with other organizations to prevent duplication of efforts.
- o Strong impact on local communities, thereby enhancing their resilience and capacity to protect biodiversity.
- o Endorsement from relevant government authorities through the corresponding National Designated Authorities.

Check [here](#) what CEPF does **not** fund.

Before awarding any grant, CEPF will screen all projects against [CEPF's safeguard policies](#) in order to prevent any potential negative impacts of the project on humans and the environment.

CEPF will also evaluate the projects based on gender equality. CEPF has developed several resources that can help applicants to design, implement and evaluate gender-responsive projects ([CEPF Gender Toolkit](#)) and understand what CEPF expects in a proposal ([CEPF Gender Fact Sheet](#)). Visit the [CEPF and Gender webpage](#) to learn more about how CEPF addresses gender equality in the projects it supports.

## 2. HOW TO APPLY

Large grants applicants must respond to the call **no later than 20 September 2024, 11.59 pm (Eastern Time, GMT-4)**. via the [ConservationGrants](#) electronic portal in either French or English. An automated acknowledgement email will be sent by ConservationGrants confirming that the submission has been received.

CEPF will not accept LOIs via email or any other mechanism for this call.

Existing ConservationGrants users must use their credential information to login. If you have

not previously used ConservationGrants, you will need to [register for a new account](#) by clicking on the “New User?” or “First time user? Click here” on the main page. If you encounter any technical difficulties with ConservationGrants, please email [conservationgrants@conservation.org](mailto:conservationgrants@conservation.org).

Questions can be sent to the RIT at [cepfproposals@iucn.nl](mailto:cepfproposals@iucn.nl), by specifying in the subject line the proposed country of implementation (or “multi-country” when relevant).

LOI submitted past the deadline or in any other language will not be eligible.

### 3. SELECTION AND AWARD PROCESS

**An online information session (in French) will be held on Monday, 19 August from 3:00 p.m. to 4:30 p.m. (Comoros time, GMT+3)** to inform all potential candidates and give them the opportunity to ask questions. The session will be recorded.

- Register here to join the French Online Information [Session](#)

**Face-to-face sessions are scheduled for 9 August in Anjouan, 14 August in Mohéli and 17 August in Moroni.** For more details on the organisation of the information sessions, please refer to the RIT focal point in Comoros Initiative Développement | ID.

On this [webpage](#), a Q&A section will be regularly updated by the RIT up till the deadline of the Call for LOI, providing detailed answers to the questions submitted by the applicants.

Before submitting your LOI, we encourage you to read the “[12 Tips for Getting Your Grant Idea Funded](#)” for helpful advice.

The selection process of the LOIs will take approximately eight weeks from the submission deadline. All applicants will receive a notification following the review of their LOI.

Large grant applicants whose LOIs receive a positive review will be invited to attend a masterclass in the first week of December 2024 and then submit a full proposal approximately by the end of January 2024, again through ConservationGrants. More information on the masterclass will be provided to each applicant having received a favourable review of their LOI.

Final approved Full Proposals will be awarded a large grant, with an agreement made between Conservation International, as the host of CEPF Secretariat, and the applicant’s organisation (the “grantee”).

Grants will be in United States dollars and grant agreements will be in English or in French.

## 4. REFERENCE MATERIALS

All applicants are advised to review the ecosystem profile for the Madagascar and the Indian Ocean Islands Biodiversity Hotspot, which provides more detail on the types of activities CEPF will fund under each investment priority.
