

Table 1. Atlantic Forest Region Logical Framework for Consolidation

Objective	Targets	Means of Verification
Reinforce and sustain the conservation gains achieved as a result of previous CEPF investment in the Atlantic Forest Region	At least 60 civil society actors, including NGOs and the private sector, actively participate in conservation programs guided by the Atlantic Forest ecosystem profile and Program for Consolidation	Grantee performance reports and Annual Portfolio Overview Reports
	At least 22 protected areas (1,200,000 hectares) with strengthened protection and management	Grantee performance reports
	The Atlantic Forest Protected Areas Initiative implemented and operative.	Grantee performance reports and Annual Portfolio Overview Reports
	50% of targeted communities involved in sustainable use projects demonstrate tangible socioeconomic benefits	Final project reports

Intermediate Outcomes	Targets	Means of Verification
Outcome 1. Involvement of local stakeholders increased and their capacity for planning/ implementation of conservation actions strengthened as means to implement the Central Corridor focused on its priority areas and their networks of protected areas \$250,000	Network of about 80 local institutions that aims the sharing of experiences for consolidation of Atlantic Forest Central Corridor.	Grantee performance reports
	Capacity development plan established to assist the leading institutions of each minicorridor (18 to 20 institutions)	Grantee performance reports

Intermediate Outcomes	Targets	Means of Verification
	Monitoring program implemented to help the development of 10 subprojects for minicorridors supported by the Ecological Corridors Project of the Brazilian Ministry of Environment/PPG-7.	Grantee performance reports
<p>Outcome 2. Local capacity in the Serra do Mar biodiversity Corridor strengthened aiming to support the integrated management and consolidation of four mosaics of protected areas, as well the promotion of connectivity among key protected areas.</p> <p>\$850,000</p>	Four mosaics of protected areas, affecting 69 protected areas, strengthened and in process of implementation.	Grantee performance reports
	Actions promoted for increased institutional capacity involving 200 individuals.	Grantee performance reports
	Councils of the four mosaics operating properly.	Grantee performance reports
	8 small grants provided leading to connectivity among key protected areas.	Grantee performance reports
<p>Outcome 3. Effective management, protection, and long-term sustainability of key public and private protected areas within the Atlantic Forest biodiversity corridors ensured</p> <p>\$964,457</p>	Legal and financial mechanisms developed to improve management and sustainability of public and private reserves.	Grantee performance reports
	Plans developed and implemented to build capacity of state associations of Private Natural Heritage Reserves (RPPNs) and NGOs which work with private reserves, leading to improved management of the reserves	Grantee performance reports

Intermediate Outcomes	Targets	Means of Verification
	At least 5 subgrants provided to increase the institutional capacity for private reserves management	Grantee performance reports
	Atlantic Forest Protected Areas Initiative (AFPAL) logistical structure implemented	Grantee performance reports
	Based on study of management status of protected areas, investment priorities plan established for the Atlantic Forest Protected Areas Initiative (AFPAL)	Grantee performance reports
<p>Outcome 4. Projects that compose the CEPF Consolidation Program in the Atlantic Forest integrated and monitored.</p> <p>\$335,543</p>	Consolidation grants coordinated; projects developed and implemented; networks promoted; and results disseminated	Grantee performance reports
