

Table 2. Southern Mesoamerica Logical Framework for Consolidation

Objective	Targets	Means of Verification
Reinforce and sustain the conservation gains achieved as a result of previous CEPF investment in the Southern Mesoamerica Conservation Corridor, specifically in the biosphere reserves of Southeast Nicaragua and La Amistad in Panama	609,980 hectares located in key biodiversity areas with strengthened protection and management.	Grantee performance reports and Protected Areas Tracking Tool (SP1 METT)
	1,014,300 hectares in production landscapes with improved management for biodiversity conservation	Grantee performance reports and Productive Landscape Tracking Tool (SP2 METT)
	\$750,000 leveraged	Final project reports
Intermediate Outcomes	Targets	Means of Verification
<p>Outcome 1. Conservation and human welfare considerations are fully incorporated into infrastructure and development plans for areas in the corridor under immediate threat in southeast Nicaragua and the La Amistad Biosphere Reserve in Panama.</p> <p>\$300,000</p>	Four policies influenced as a result of CEPF grant consolidation, including six individual infrastructure projects and development plans.	Grantee performance reports and Annual Portfolio Overview Reports
	Four projects enable effective stewardship by indigenous and local communities for biodiversity and ecosystem conservation.	Grantee performance reports
	Three sub-corridors under improved governance for sustainable development through achievement of key conservation milestones.	Grantee performance reports

<p>Outcome 2. Governance and management structures and plans improved in over 1.4 million hectares in Southeast Nicaragua and La Amistad Biosphere Reserve in Panama. \$775,000</p>	<p>Four KBAs demonstrate improvements in their protection and management</p> <ol style="list-style-type: none"> 1. Indio Maiz Biological Reserve (263,980 ha) 2. La Amistad International Park, Panamá (207,000 ha) 3. Palo Seco Forest Reserve (125,000 ha) 4. Volcan Baru National Park (14,000 ha) 	<p>Grantee performance reports and Protected Areas Tracking Tool (SP1 METT) Annual Portfolio Overview Reports</p>
	<p>Over one million hectares in production landscapes with improved management for biodiversity conservation.</p> <ol style="list-style-type: none"> 1. 54,900 ha – Punta Gorda Nature Reserve 2. 339,400 ha – Cerro Silva Nature Reserve 3. 10,000 ha – Naso indigenous territory 4. 600,000 ha – Ngobe – Bugle indigenous territory 5. 10,000 ha – La Amistad Pacific Buffer Zone 	<p>Grantee performance reports and Productive Landscape Tracking Tool (SP2 METT)</p>
	<p>100% of targeted communities involved in sustainable use projects demonstrate tangible socioeconomic benefits.</p>	<p>Grantee performance reports</p>
	<p>Four projects located outside protected areas integrate biodiversity conservation in management practices.</p>	<p>Grantee performance reports</p>
<p>Outcome 3. Five civil society partners and three stakeholder alliances demonstrate requisite organizational and program management capacity in order to undertake effective, well coordinated conservation actions in the future.</p>	<p>Five local civil society groups demonstrate improved institutional capacity to foster sustainability</p>	<p>Institutional strengthening scorecard</p>

\$300,000		
	Eight stakeholder networks strengthened to support long-term conservation action by replicating and scaling up CEPF successes.	Grantee performance reports and Annual Portfolio Overview Reports
Outcome 4: Stable funding mechanisms are operational in support of priority management needs in southeast Nicaragua and La Amistad – Panama.	Three sustainable financing mechanisms established and/or strengthened with initial capital secured.	Grantee performance reports
\$300,000
