

## Eastern Afromontane Ecosystem Profile

### Appendix 1. Species Outcomes in the Eastern Afromontane Hotspot

The list of priority species consists of all Globally Threatened species found in the hotspot: those that are listed as Critically Endangered, Endangered, or Vulnerable according to the IUCN Red List. 677 Globally Threatened species are known to occur in the hotspot.

For Distribution by Country, the “1” refers to “present in country.”  
Total Countries” refers to the number of countries within which the species is found.
